

PROPOSAL

INVESTMENT IN ELECTRIC MOTORCYCLE PRODUCTION UNIT

WWW.SUPREMIUM.INTERNATIONAL

SUPREMIUM INTERNATIONAL: EMPOWERING SUSTAINABLE MOBILITY SOLUTIONS

Supremium International invites you to invest in an exciting new opportunity: the Electric Motorcycle Production Unit in Morocco. This project aims to assemble electric motorcycles, focusing on models equivalent to 50cc combustion engines, and produce selected small parts for these motorcycles. This venture represents an opportunity to capture Morocco's emerging market in electric mobility, which is set to grow significantly as the country aligns itself with green energy initiatives and reduced emissions.

WHY INVEST IN ELECTRIC MOTORCYCLE PRODUCTION?

- **High Market Potential:** The global electric motorcycle market is experiencing significant growth, with millions of units sold annually, particularly in markets like China, where 5-6 million units were sold in 2019 alone. Morocco has the opportunity to position itself as a key player in this expanding sector, focusing on meeting local demand while also considering exports to other African countries. The government's focus on green public initiatives and electric delivery fleets further increases the demand for electric motorcycles.
- **Strategic Production Capabilities:** The project will focus on establishing an assembly line for electric motorcycles, complemented by local production of select small parts, such as structural and mechanical components. By using electric powertrains and batteries, the production unit will support Morocco's renewable energy goals while reducing the total cost of ownership for end-users. This approach not only makes electric motorcycles more affordable but also aligns with the growing emphasis on sustainability.
- **Financial Returns and Investment Structure:** The estimated investment required for the electric motorcycle production unit is between 450,000 and 900,000 euros (for an annual production capacity of 2,000 to 3,000 units), with potential annual revenue of 2.3 to 3.6 million euros. The EBIT margin is projected to be around 10% to 15%, offering promising returns for investors. With the rising market for electric vehicles, this venture provides a strong opportunity for high profitability with moderate initial capital outlay.
- **Comprehensive Financial Assistance and Support:** Supremium International offers extensive support for investors, including assistance in accessing government grants, training aids, and preferential financing options. Programs are available to help ease the financial burden of startup, including support for training and SME financing. In addition, strategic land locations, such as ZAI Souss-Massa, Tanger Automotive City, and the Atlantic Free Zone, are available to facilitate production setup. Supremium International will be by your side throughout the entire process to ensure a smooth and efficient investment journey.

DETAILED FINANCIAL OVERVIEW

Metric	Short Description	Value
Initial Investment	Required capital to establish the production unit	450,000 - 900,000 euros
Annual Revenue	Projected yearly income from operations	2.3 - 3.6 million euros
EBIT Margin	Expected profitability margin before interest and taxes	10% - 15%
Direct Employment	Number of direct jobs created	~20 - 30 jobs
Financial Assistance	Availability of grants, subsidies, and loan options	Various government-backed programs, mezzanine loans

Key Advantages for Investors:

- **High Growth Market with Local and Regional Demand:** With the increased emphasis on reducing emissions and moving towards electric mobility, there is substantial local demand for electric motorcycles. This project also provides export opportunities within Africa, where affordable electric transportation solutions are gaining traction.
- **Economic and Social Impact:** By investing in the electric motorcycle production unit, you contribute to Morocco's sustainable development goals, creating jobs and reducing carbon emissions. The project will generate positive environmental and social impacts, aligning with modern ESG (Environmental, Social, and Governance) standards, which is increasingly important to investors worldwide.
- **Government Incentives and Support:** : The Moroccan government actively supports the development of renewable energy and sustainable transport through a variety of incentives, subsidies, and preferential financing options. Supremium International will help investors access these benefits, making this investment even more financially attractive and viable.

Reliable Supply Chain: With key components such as electric powertrains, batteries, and structural parts available through local and regional suppliers, the production unit will benefit from a stable and reliable supply chain. Morocco's growing expertise in renewable energy and electric mobility further supports the success of the electric motorcycle production unit.

JOIN US IN MAKING A DIFFERENCE

At Supremium International, we provide not only the platform for investment but also complete end-to-end support—from securing permits and building partnerships to connecting you with key stakeholders and maximizing your market entry impact. Our expertise in navigating regulatory frameworks and establishing fruitful partnerships means that your investment process will be as smooth as possible. We will be with you every step of the way, ensuring that you benefit from all available resources and successfully establish your foothold in this high-potential industry.

Take the First Step Today:

We invite you to schedule a consultation with us to explore how you can be part of this transformative project. With Supremium International by your side, investing in the Stone Paper Production Unit will be seamless and rewarding. Contact us today to secure your position in this high-potential venture. Our team of experts is ready to discuss how we can turn this opportunity into a success story together. Don't miss the chance to be a pioneer in an industry that is not only profitable but also environmentally crucial.
